Exercise – Prototyping (7 studypoints)

Exercise:

In the context of your project:

Create a set of explorative prototypes that might be used to clarify questions about requirements and desirable features.

1. Select a user task for which <u>alternative</u> solutions could be considered.
    a. focus on features - not user interface

2. Construct two prototypes illustrating the different options
    a. use paper and glue, a tool or program it as you like

Groups:

Project groups

Presentation in the classroom:

Present the result for the teacher in the classroom on Friday

Studypoints:

7 study points is earned by each group member present during the presentation (if approved)

0 study points is earned otherwise. No further grading will be done.

No written hand in is accepted.
